SUN Project was the first and original PsyTrance act who consequently started the concept of combining Rock/Metal influences with Psychedelic Trance productions back in 1995. Since those days this guys don..t go on stage without electric guitars and drums, beside the more typical computerized equipment. Today you can find some more other acts in this scene who started to use this concept for themselves later. S.U.N. Project is one of the few acts which have kept their name alive in the PsyTrance scene over 11 years now! They released 9 albums on different record labels. "Wicked", the latest of these albums ist still available, the older albums are unfortunately sold out completely.

STAR SOUNDS ORCHESTRA (Spiritzone) - Germany

Durch die 1989 begründete Zusammenarbeit mit Steve Schroyder im Star Sounds Orchestra entsteht eine zukunftsweisende Form kosmischer Musik, die in verschiedensten Produktionen ihren Ausdruck findet. Durch die Interaktion mit dem Forscherkreis der Kosmischen Oktave unter der Ägide des Schweizer Harmonikers Hans Cousto hat sich eine bis in die Jetztzeit fruchtbare Klangforschung ergeben, die in einer konsequenten neuorientierten kosmischen Stimmungsweise auf Grundlage sphärenharmonikaler Betrachtungen in der Lage ist, eine Synthese von Wissenschaft und Kunst innerhalb musikalischer Programme darzubieten. Vor allem durch die besondere Stimmungssysteme hat sich das SSO mit seiner einzigartigen Live Show zu einem der gefragtesten Undergroundacts im Genre PSY Trance entwickelt.

**PEAKING GODDESS COLLECTIVE (Peak rec.) - Swiss**

<http://www.myspace.com/thepeakinggoddesscollective>

The Peaking Goddess Collective, a four-piece live digital & organic band known for its outstanding and longstanding performances, was born in Switzerland in 2003. Originally founded by guitarist Ajja S.F. Leu, bass-player Master Margherita and percussionist Dymons, it reached its current formation a year later when flutist Flooting Grooves joined in. The PGC is often linked with Peak Records, because two of its members are Peak founders Ajja and Master Margherita. Masterfully fusing acoustic instruments & electronic devices to form a unique style – the Collective is known for its unmistakable approach to trance, be it chilled ethnic beats, expansive morning trance or foot-stomping psytrance.

**Live Producers Second Floor:****FLOWJOB (Iboga rec.) - Denmark presenting there new album "Zentertainment"**

<http://www.myspace.com/flowjobmuzic>

The project was started by Joakim in 2002 and after some early releases on Love Sonic Disco Records, Millenium & Iboga, Mads became a part of the project.. The 2 of them used to play in a band together at an early age, and it was obvious they had to make an electronic project since the interest for this music had been there since 1993.. After some time in the studio they started to create their own characteristic style which roughly can be described as powerfull melodic morning trance, with funky rythms and a positive uplifting feeling..

**EVOLENT (Superbike) - Swiss**

<http://www.myspace.com/evolentmusic>

Evolent could very well be called the positive result of a long-term friendship between Tobi Trächsel and Ron Rüegg, both hailing from Switzerland. But that would leave out major parts of a large story!

Evolent essentially unites the musical ideas and preferences of Tobi and Ron, who day after day invent new inspiring elements from all ranges of music and sound design. They combine their different backgrounds and complement each other in an excellent way; Tobi's background as a DJ and Ron's experience as a producer and musician.
